

HTTP 1.1 specification

Clients that use persistent connections **SHOULD** limit the number of simultaneous connections that they maintain to a given server.

A single-user client **SHOULD NOT** maintain more than 2 connections with any server or proxy.

# HTTP 1.1 specification

Clients that use persistent connections **SHOULD** limit the number of simultaneous connections that they maintain to a given server.

A single-user client **SHOULD NOT** maintain more than 2 connections with any server or proxy.

# Connections per hostname
